ABOUT ME:

Data Science MSc student at TU Darmstadt specializing in machine learning, data analysis, and business intelligence. Experienced in building predictive models, developing dashboards (Power BI, Tableau), and extracting actionable insights from real-world datasets. Currently seeking a Working Student or Internship role in Data Science or Analytics.

EDUCATION:

Bachelor of Information Engineering and Technology
German University in Cairo
10/2020 – 07/2025 | Cairo, Egypt

Master of Data Science
TU Darmstadt
10/2025 | Darmstadt, Germany
Expected Graduation: 09/2027

EXPERIENCE:

Orange Business
Data Science Intern
10/2024 – 02/2025 | Cairo, Egypt

- Designed and implemented machine learning models on telecom datasets to identify customer behavior patterns and support churn prediction, enhancing analytical accuracy.
- Delivered data-driven insights by building Power BI dashboards and automating data pipelines, improving reporting efficiency and supporting business decision-making.

Misr Technology Services (MTS)
Data Science Intern
01/2024 – 06/2024 | Cairo, Egypt

- Conducted end-to-end data analysis (EDA, preprocessing, and feature engineering) using Python and SQL, and built interactive BI dashboards that enhanced data quality, streamlined reporting processes.

DATA SCIENCE PROJECTS:

Predictive Maintenance of NASA Turbofan Engines (Bachelor Thesis Project)

- Developed machine learning models (TensorFlow, Scikit-learn) to predict Remaining Useful Life (RUL) of turbofan engines and Li-ion batteries.
- Performed data preprocessing, feature engineering, and EDA on time-series datasets, and optimized model performance using RMSE and MA

Customer Shopping Behavior & Revenue Analysis

- Processed and analyzed transactional data (~3,900 records) using Python (Pandas) and PostgreSQL, and developed an interactive Power BI dashboard to visualize customer behavior, identify key revenue drivers, and generate actionable business insights.

British Airways Service Quality & Satisfaction Analysis

- Designed and developed an interactive Tableau dashboard analyzing customer reviews and geographic data to evaluate global service performance and identify key drivers of passenger satisfaction for British Airways.

CORE SKILLS:

Machine Learning, Data Analysis, Data Visualization, Feature Engineering, Exploratory Data Analysis (EDA), Python, SQL, Java, Pandas, NumPy, Scikit-learn, TensorFlow, PostgreSQL, MySQL, MongoDB, Firebase, Power BI, Tableau, Git, Jupyter Notebook, Linux

LANGUAGES:

German:
B1 (Goethe Certificate)

English:
IELTS 7 (C1)
